Outbound Package Management

SendPro® Enterprise

Control shipping and mailing costs with a single sending solution.

Achieve visibility and accuracy with a smart, cloud-based solution.

When every department takes care of their own shipping and mailing, it can be hard to control costs. Overspending is common when different shipping systems or non-compliant account numbers are utilized. Plus, it's difficult to capture accurate client and departmental charges. Now, one system can help you in every location. SendPro Enterprise (SPE) is a cloud-based multi-carrier shipping and mailing system that offers greater control, visibility and accuracy. Harness costs and operate your business with greater efficiency, whether employees are at headquarters, a satellite office or a remote location.

Centralize operations to boost your bottom line.

- Cut costs with one, consolidated cloud-based platform.
- View all activity and costs for all locations and carriers.
- Simplify how employees send overnights, packages, parcels and Certified Mail®.
- Standardize processes for proper accounting and tracking.
- Streamline payments with one monthly bill for major carriers, including the USPS®.¹
- Choose the most cost-effective carrier.

Take control to make shipping and mailing more efficient.

Better visibility can improve how you manage and control your shipping and mailing operation. SendPro® Enterprise offers a company-wide view of your spending and activity in a single cloud-based dashboard, enabling you to view every user and every location. Instead of multiple invoices and time-wasting manual accounting, SendPro Enterprise automatically captures all costs by location and user. You can even choose to consolidate carrier charges and make one payment through a dedicated shipping and mailing account.

- Use one efficient system across your mail center, headquarters, satellite offices and remote work places.
- Single sign-on allows you to turn off or turn on a user easily, adding a layer of security.
- Give employees the tools to ship and print postage efficiently.
- Import all contacts and verify addresses within one system.
- Consolidate shipping and mailing charges from all major carriers to make to make only one monthly payment.¹

Empower employees to make smarter decisions.

With shipping costs estimated to represent up to 10 percent of your bottom-line expenses², SendPro Enterprise allows your employees to rate shop and reduce expenses every time they send.

- Compare rates from multiple carriers side-by-side to discover money-saving options.
- View accurate information regarding savings, landed costs, delivery date and time.
- Displays rate-shopping alerts to notify employees when less expensive alternatives exist.
- Allows employees to review delivery options across carriers for more efficient selection.

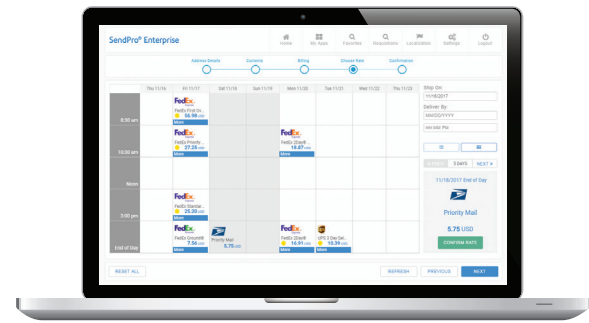

Pinpoint cost and auditing accuracy.

Instead of wasting time and resources with manual cost entry, SendPro Enterprise automates accounting to remove the complexity and risk by capturing all costs with a single tool.

- User-level data provides accuracy and clarity through reports and analytics.
- Analytics provides continual savings and lost opportunities view.
- Enhanced visibility improves compliance for regulatory control.
